

Name: [Faruq Ariyo Oladura]

Location: Remote (Nigeria)

Availability: Full-Time / Contract

Email: [ariyofaruq1@gmail.com]

---

## PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building, maintaining, and scaling real-world web applications. Strong focus on backend systems, API development, and clean frontend integration. Trained through formal technical institutes and reinforced by practical industry experience, including a year-long internship and production backend work. Known for strong debugging skills, clear code structure, and the ability to operate effectively in fast-moving, remote engineering teams.

---

## TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, API Design & Versioning, WebSockets

Databases: PostgreSQL, MySQL, MongoDB, Supabase (Postgres, Auth, Storage)

Backend Capabilities: Authentication & Authorization (JWT), API Security, Business Logic Design, Data Modeling, Performance Optimization

Tools & Practices: Git, API Documentation, Debugging, Code Reviews, Testing

---

## PROFESSIONAL EXPERIENCE

### Backend Developer | Telluxa NG

Designed, implemented, and maintained backend services powering customer-facing and internal applications.

Built and managed RESTful APIs handling core business logic, authentication flows, and data transactions.

Worked extensively with PostgreSQL and MySQL for schema design, complex queries, indexing, and data integrity.

Integrated Supabase services (Postgres, Auth) to accelerate development while maintaining production-grade reliability.

Collaborated closely with frontend engineers to define API contracts, resolve integration issues, and improve overall system performance.

Debugged and refactored legacy backend code, improving maintainability and reducing runtime errors.

Participated in feature planning, technical decision-making, and iterative delivery in a real production environment.

---

### Full Stack Developer Intern | Stephotec Nigeria

Completed a two-years intensive internship combining structured training with hands-on production work.

Built full-stack application features using React on the frontend and Node.js/Express on the backend.

Developed REST APIs, authentication logic, and database-backed features under senior developer guidance.

Worked with PostgreSQL and MySQL to design schemas and implement CRUD operations.

Gained real-world experience with debugging, version control, code reviews, and team-based development workflows.

Transitioned from training exercises to contributing directly to live projects.

---

## EDUCATION & TRAINING

Software Engineering / Full Stack Development

RLTech Institute, Nigeria

Backend & Full Stack Development Training

Stephotec Nigeria

---

## PROJECT EXPERIENCE

### Production Web Applications

Contributed to real-world applications involving authentication, dashboards, and data-driven features.

Focused on clean architecture, maintainable code, and reliable API behavior.

### Backend Systems & APIs

Built modular backend components designed for reuse and long-term scalability.

---

## ADDITIONAL EXPERIENCE

### Technical Trainer / Student Mentor | Stephotec Nigeria

Assisted in training and mentoring junior students during full stack and backend development sessions.

Explained core backend concepts including APIs, database operations, and authentication in clear, practical terms.

Supported students with debugging, code structure, and best practices during hands-on projects.

Helped reinforce real-world development workflows alongside formal training programs.

---

#### ADDITIONAL STRENGTHS

Strong problem-solving and debugging mindset.

Ability to quickly understand existing codebases.

Comfortable working independently or within distributed teams.

Continuous learner with a practical, systems-oriented approach to development.
